tpu-SKIN®

An exclusive technology, which allows to reduce the outsole's thickness (the hardest and heaviest part) into a thin layer of some tenths of millimeter, called TPU Skin.

By increasing the midsole's thickness (the lightest and softest layer) through the air-tech technology, we obtain one of the most flexible and anti fatigue sole (**higher cushioning effect**).

**More flexibility** and less pressure on the metatarsal, which allows to walk like on a soft carpet.
